What is the SMART 21 Project?
The SMART 21 Project was instituted to harness the benefits of modern information technology and accelerate the pace at which the State of Nevada realizes the value of shared computing infrastructure. Focused on financial management, human resources management and related systems, the SMART 21 Project offers an opportunity to replace our legacy IT system – of 18 years - with a more efficient, secure, and upgradable IT system through a more effective approach to resources and technology investments in the 21st century.

SMART Objectives:
SMART 21 has two primary objectives:

1. Implement an integrated, flexible ERP system that supports standardization of data and business processes, and meets the State of Nevada’s current and future needs; and
2. Realize an “Efficient and Responsive State Government” that delivers excellent customer service, streamlined processes, and top-performing employees.

SMART 21 Sponsorship and Support
The SMART 21 Executive Committee provides sponsorship, executive level guidance on matters of project execution, strategy and outreach to departments and agencies. The SMART 21 Steering Committee, represented by key business stakeholders, ensures the project serves the business needs of the state while minimizing technical and operational risks.

SMART 21 Today
The SMART 21 OPM has conducted extensive workshops across all state agencies engaging over 450 subject matter experts and stakeholders to define the requirements for the future ERP. These requirements are explained in a comprehensive request for proposal to be released in August of 2018 and contract award and implementation scheduled for July of 2019.

SMART 21 Needs You!
The SMART 21 OPM continues to conduct outreach events to engage the State’s workforce and provide opportunities to contribute, ask questions, receive feedback and plan for future implementation activities that will impact your agency. Please visit SMART 21 Outreach on our website http://smart21.nv.gov to learn more about how you can contribute!
